

### **AMENDMENTS TO THE DRAWINGS**

The drawings were objected to as failing to comply with 37 C.F.R. 1.84(b)(5) because they did not include certain reference numerals mentioned in the Specification. For instance, the numeral "50" was improper as it originally referred to the controller (i.e. see Figure 2), the wrist spacer is more properly referred to by the numeral "48" as used throughout the Specification, and particularly page 11.

The enclosed complete set of drawings includes proposed drawing corrections submitted to correct the objection. No new matter has been added. The numerals that have been placed on the drawings correspond to the discussion in the Specification. No new matter has been added to the Specification.

It is believed that the drawings as now corrected and submitted herewith will cure the objections set forth in the Examiner's Official Action.
